## What is Poly?

### ENVIRONMENTALLY-FRIENDLY

Poly is High Density Polyethylene (HDPE), a recyclable plastic derived from post-consumer waste such as milk and detergent bottles. This material is cleaned in a decontamination process to a purity level of over 99% HDPE, then compounded into solid board stock material. The resulting product contains over 90% recycled post consumer waste by weight.

### WILL NOT DETERIORATE

Exceptional resistance to moisture, fading, insects, splintering, warping and other hazards of environmental exposure common to wood or wood fiber composite products

### UV STABILIZED COLOR

High color stability UV pigment systems which minimize material breakdown from prolonged sun and weather exposure

### ESSENTIALLY MAINTENANCE-FREE

Requires no waterproofing, staining, or other similar recurring maintenance other than an occasional washing with soap and water

## Luxcraft Poly Colors

Our maintenance-free poly furniture is made in 32 colors. Be sure to check each item for individual stock colors. Most items are available in non-stock colors for an upcharge. Colors are shown to the best of our ability, but due to photographic lighting and limitations in printing, actual product colors may vary slightly from those shown below.
